

架屋环舍

设计说明:

该民宿位于诸家村诸云飞家等几户的收储房。场地关系较为复杂，周围的新建小洋房与旧建筑形成了文脉的冲突，所以我们选择不破坏原有的房屋墙体，只是进行必要的维护，以谦卑的手法介入同时加入传统的建筑元素，继承渔村的文脉。我们将诸云飞家的平台形式加以提炼，将原有建筑以新的结构体系夹高，并用环绕的连廊将建筑串成一体。同时连廊的方向指向湖堤岸的方向，有很强的引导性。建筑和连廊自然的将场地分为三个不同的院子，并和连廊配合产生不同的使用情景。院子和连廊将民宿分为两种层次的游览体验，并将广阔的湖景尽归眼底，完成旧建筑的重生。

Design description:

This hostel is located in Yunfei Zhu storage and others in the Zhujia village. The relationship of the site is complex. The surrounding new small foreign houses and the old buildings have formed a literary conflict. So we choose not to destroy the original housing walls, but to carry out necessary maintenance, intervene with humility, and add traditional architectural elements to inherit the context of fishing villages. We refine Yunfei home platform form. And the original building structure with the new system of heightening. We combine the buildings with a surround gallery. At the same time the direction of the corridor which have a strong directivity points to the lake bank. Naturally, the site is divided into three different yards by building and corridor. The yards combine with the corridor, producing different using scenes. Yard and corridor classify the sightseeing experience of hostel into two levels. The beautiful scenery of the vast lake be fully appreciated. The rebirth of the old building was completed then.
