*A floating path
between
heaven and earth*

天空和大地之间漂浮的路径

A never ending walk in the nature

大自然间永无止境的漫步

Conceptual maquette

A floating path that allows visitors to immerse themselves in nature within that thin line that divides heaven and earth.

Being the circle symbol of the sky, the path is circular; along it, visitors will walk aimlessly, whose purpose is to achieve harmony between themselves and the whole, in a limbo without space and time.

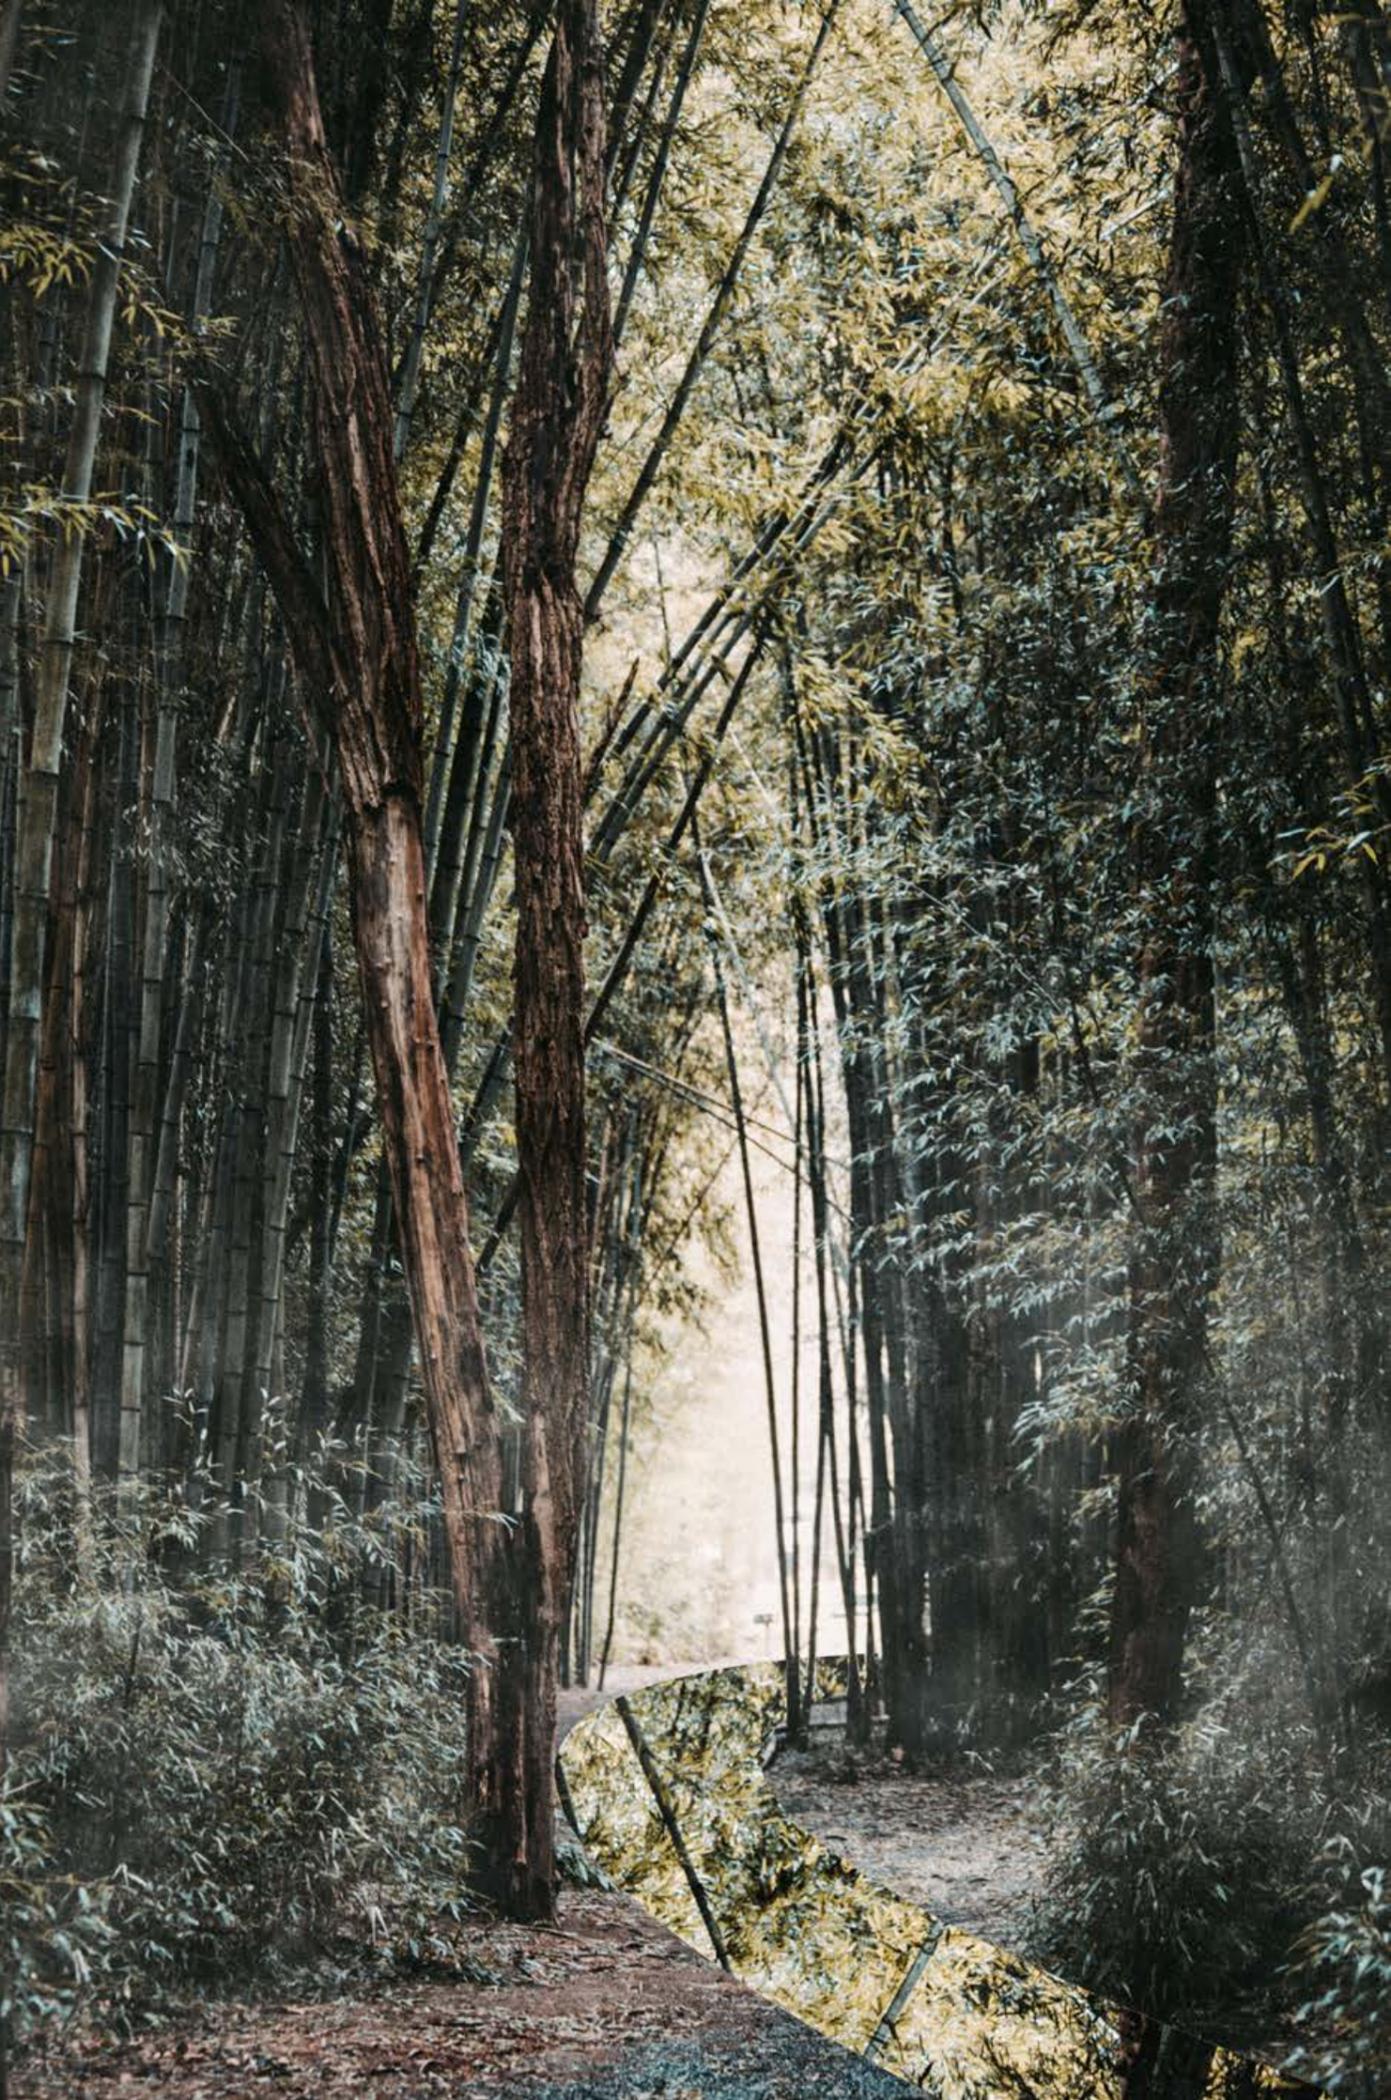

The reflection of the mirrored path at first seem invisible but walking the feelings become stronger and stronger, allowing the visitor's spirit to achieve inner harmony with the nature that surrounds it.

The spirit moves in a circle.

TECHNICAL PROPOSAL

The artwork is proposed in two different structure versions to match the necessity of cost/time unspecified in the call.

The first proposal is based on a steel structure with a mirrored inox sheet. To prevent sliding (during rainy days) the steel surface will be treated with antislip paint.

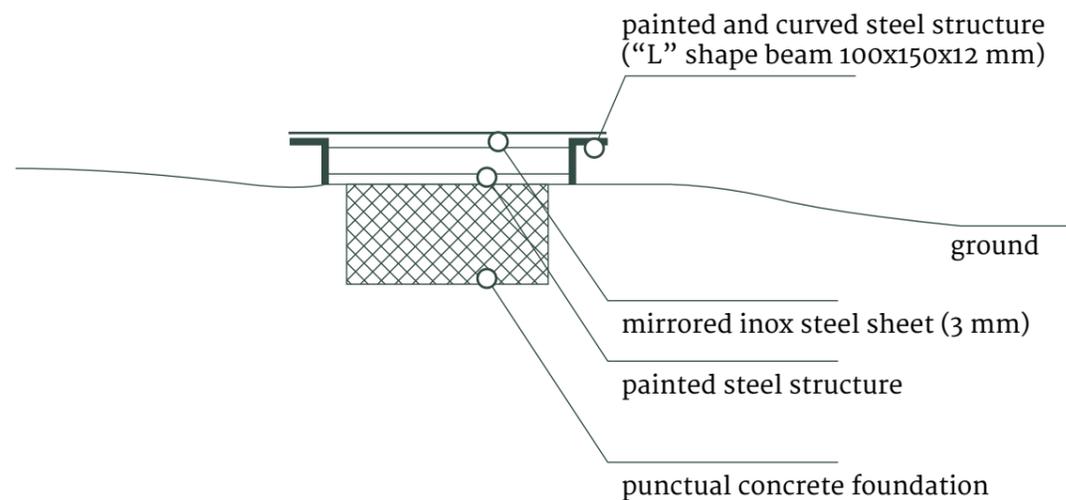

This proposal has a low maintenance cost and but is really durable (more than 10 years).

The second proposal is based on a wooden structure with a mirrored plexiglass sheet.

This proposal is less durable (6 months).

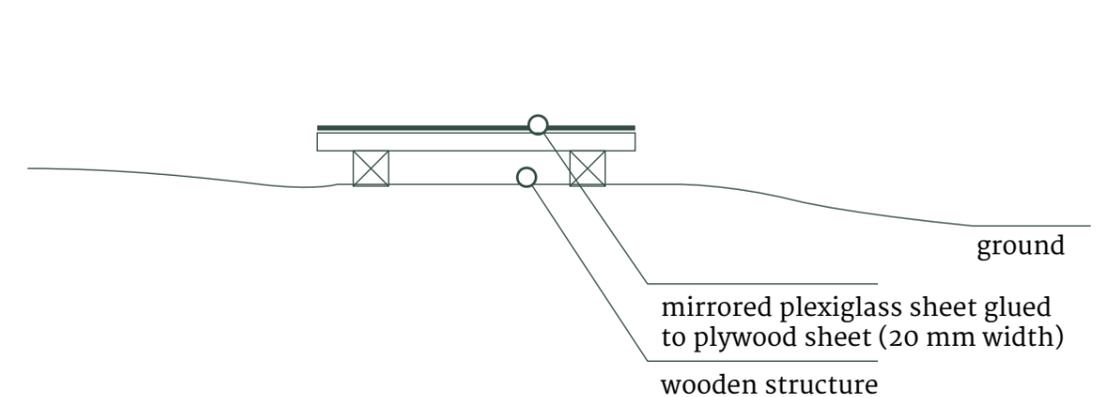

Permanent artwork proposal
