项目现状

2019芦溪民宿设计大赛  
水山村一号设计点

本项目位于中国江西省萍乡市芦溪县，基地周边环境优美，主要自然资源为山林地与稻梯田。基地现房屋现状为江南乡村典型的木结构夯土民房，有部分房屋已坍塌。

This project is located in Luxi County, Pingxiang City, Jiangxi Province, China. The environment around the base is beautiful. The main natural resources are as follows: mountain woodlands and rice terraces. The present housing situation of the base is typical rammed earth dwellings with wooden structure in the countryside of the south of Yangtze River. The part of the house has collapsed when we start designing.

此次民宿设计项目，我们非常注重城市人群休闲方式的诉求点。他们离开城市想逃离什么？他们来到山村又想获取什么？结合“云溪上”品牌六年的运营经验，我们发现民宿的消费人群发生了很大的变化：他们不再是单纯的为了逃离城市喧嚣而躲进山里发呆，他们需要山村绝好的自然环境与风景，同时需要城市所带给他们的舒适与便捷。于是，我们提出了“离城不离城”的产品理念。而且，消费人群年龄层越来越年轻化，他们不再形影单只，他们更愿意结伴而行。于是，我们致力于打造具有城市舒适度的，具有山村特色的，且适合年轻人聚会的民宿产品。

In this residential design project, we attach great importance to the urban people's leisure mode. They escape from the city. What do they real want to escape from? What do they want when they come here? Combining with the six years' operation experience of "Yun Rivera", we find the great changes have taken place in the residential consumers. It is that they are no longer simply hiding in the mountains to escape the noise of the city; they need mountain villages to be excellent. The natural environment and scenery also need the comfort and convenience brought by the city. Therefore, we put forward the product concept of "stay-off dust, city in-heart". Moreover, consumers are getting younger and younger. They are no longer alone. They are more willing to go with each other. We are committed to creating a residential product with the characteristics of mountain villages, and a suitable one for young people to gather; and we never forget the comfort to the urban.

我们通过对基地环境地理特征进行梳理，重新定义三栋建筑之间的动线关系。考虑建造成本及尊重原有建筑面貌，我们并没有选择简单的推倒新建，而是采用结构加固的方式保留了原房屋。我们将所有朝南面的窗户尽可能的开大，是为了将优美的自然景观借入到室内的视觉效果。我们在每栋楼的每一层都设计了可围坐聚会的公共空间，设置了可亲自烹饪的共享厨房，可一起玩耍的游戏空间，亲子乐园，泳池，露天咖啡馆，读书馆，视听间……众多配套设施贴合聚会的设计主题。

By sorting out the geographical characteristics of the base environment, we redefine the dynamic relationship among the three buildings. Considering the construction cost and respecting the original building appearance, we did not simply choose to new-built, but retained the original house by means of structural reinforcement. We open all the windows facing the South as wide as possible in order to bring the beautiful natural scenery into the interior. We have designed public spaces for gatherings on every floor of each building, and set up the personal cooking facilities, the sharing kitchen, the play space, the parent-child paradise, the swimming pool, the open-air cafe, the reading room, the audio-visual room and so on. Those themes are try to match the different consumers' gathering demands.
